DECLARATION OF GEORGE IAN ALLAN STEGEMAN UNDER 37 C.F.R. § 1.132

Assistant Commissioner for Patents  
Washington, D.C. 20231

Dear Sir:

I, GEORGE IAN ALLAN STEGEMAN, pursuant to 37 C.F.R. §1.132,  
declare:

1. I received a BASc degree in Engineering Science in 1965, an MSc degree in Physics in 1966, and a Ph.D. degree in Physics in 1969, all from the University of Toronto.
2. I am a Professor at the University of Central Florida at the School of Optics/CREOL®.
3. As demonstrated by my attached resume (attached hereto at Exhibit 1), I have an extensive list of publications, awards, and professional functions in the areas of optics and physics. In view of my knowledge in these areas, I have been retained by applicants as an expert for a fee of \$200 per hour.
4. I have reviewed U.S. Patent Application Serial No. 09/265,625 ("625 application") and believe that it fully discloses the use of simultaneous two photon excitation. The rationale for my conclusion is set forth below.
5. The simultaneous two-photon excitation (commonly known as Two Photon Absorption, or 2PA) phenomena and the step-wise two-photon excitation (commonly known as ESA, Excite State Absorption, or as RSA, Reversible Saturated Absorption) phenomena are shown in the following figures:

Serial No. 09/265,625

- 2 -

## Step-Wise Two Photon

## Direct (Simultaneous) Two Photon

As shown in these figures, the use of simultaneous two-photon absorption involves the simultaneous absorption of two photons (photon energy  $hc/\lambda$ ) of a given wavelength  $\lambda$  which leads to the excitation of a two-photon active absorption state at the wavelength  $\lambda/2$ , i.e. energy  $2hc/\lambda$  above the ground state. Thus, the wavelength of the exciting radiation is

Serial No. 09/265,625

- 3 -

specified for a given material and, for optimum results, the material should be as transparent as possible at the exciting wavelength. On the other hand, as shown in the above figures, in stepwise or sequential two-photon absorption, two sequential absorption events occur, sequentially in time, each involving one photon (photon energy  $hc/\lambda$ ). The absorption of the first photon requires significant single photon absorption activity into an intermediate state. This state is evidenced by a lack of transparency at that wavelength. A second, single photon absorption from that first intermediate state into the final state occurs near or at the peak of the second one photon absorption (final) state. The desirability of good transparency at the exciting wavelength range (i.e. 700 – 1300 nm) for photodynamic therapy is discussed on page 8, line 10 to page 9, line 5 of the present application. Since, as noted above, transparency is important for simultaneous two-photon absorption, and absorption is important for step-wise two-photon absorption, one would recognize that the present application intends to use simultaneous two-photon absorption in carrying out photodynamic therapy.

6. The sentence bridging pages 1 and 2 of the '625 application states:

To date, two major technical approaches have been used to achieve frequency upconversion lasing: one is based on direct two-photon (or multi-photon) excitation of a gain medium (two-photon pumped); the other is based on sequential stepwise multi-photon excitation (stepwise multi-photon pumped).

With the latter of these 2 technical approaches clearly referring to sequential multi-photon excitation as discussed above, it is apparent to me that the former alternative is describing simultaneous multi-photon excitation. ) good

7. In describing the two-photon absorption or excitation phenomena utilized by applicants, the '625 application sets forth, at page 51, line 6, the following formula:

$$I(L)=I_0/(1 + I_0LB)$$

The '625 application proceeds to describe this equation as follows on page 51, lines 7-10:

$I(L)$  is the transmitted incident intensity;  $L$  is the thickness of the matrix material;  $I_0$  is the incident infrared intensity; and  $\beta$  is the

Serial No. 09/265,625

- 4 -

TPA coefficient of the sample medium and is a linear function of the concentration of the styryl compound in the matrix.

See also page 97, line 30 to page 98, line 11 of the '625 application. This formula is well known by scientists in this area to refer to simultaneous two-photon excitation with  $\beta$  being defined in the field of nonlinear optics as the simultaneous two-photon absorption coefficient. For step-wise two-photon absorption, the relationship is not given in term of the intensity or irradiance, but in terms of an integral over the pulse energy, i.e. the energy or fluence F. On page 98, line 3,  $\beta$  is defined directly in terms of the molecular two-photon absorption coefficient  $\sigma_2$  as follows:

$$\beta = \sigma_2 N_0 = \sigma_2 N_0 d_0 \times 10^{-3}$$

$N_0$  is the molecular density of the dopant,  $\sigma_2$  is the molecular TPA coefficient of the same dopant, and  $d_0$  is the concentration of dopant. This is the formula for simultaneous two-photon absorption but not for the step-wise process which contains the product of the two single photon cross-section coefficients  $\sigma_{gi}$  and  $\sigma_{if}$ , as indicated in the above figures --one for the transition from the molecular ground state to the first excited state (i.e. the intermediate state) and one for the transition from the first excited state to the second excited state (i.e. the final state). Furthermore, the formula for step-wise two-photon excitation would also require values for the pulse duration of the laser and the relaxation time of the first (intermediate) excited state. Thus, the above formulae in the present application would indicate to one of ordinary skill in the art that a simultaneous two-photon excitation process is being used. This is supported by discussions of simultaneous two photon absorption in Eric W. Van Stryland and Lloyd L. Chase, Section 8.2.1, pages 299-328, titled Two Photon Absorption: Inorganic Materials, of the CRC Handbook of Laser Science and Technology, Supplement 2: Optical Materials, Marvin J. Weber Editor; Anthony F. Garito and Mark G. Kuzyk, Section 8.2.2, pages 329-333, titled Two Photon Absorption: Organic Materials, of the CRC Handbook of Laser Science and Technology, Supplement 2: Optical Materials, Marvin J. Weber Editor. This is also supported by

Serial No. 09/265,625

- 5 -

discussions of step-wise two photon absorption, more commonly known as ESA (Excited State Absorption), and the differences between it and direct two photon absorption (usually just referred to as "Two Photon Absorption") in E.W. Van Stryland, D.J. Hagan and A.A. Said in "Application of Nonlinear Optics to Passive Optical Limiting", chapter 14 in Nonlinear Optics of Organic Molecules and Polymers, edited by H.S. Nalwa and S. Miyata, pp 841-860 (CRC Press)

8. Further, my analysis of the experimental data set forth in the '625 application demonstrates that the applicants were utilizing simultaneous two-photon excitation. Figure 7 of the '625 application shows the absorbance spectrogram of a "dye1" doped film used in accordance with the '625 application, where this dye has no absorbance when subjected to incident photons with a wavelength greater than 600 nm, most specifically the wavelength of the Nd:YAG laser at 1060 nm. This dye and its method of preparation is described on page 95 of the '625 application in Example 6. Figure 9, as described in Example 11 (pages 97-98 of the '625 application), shows that when dye1 (i.e. trans-4[p-(N-ethyl-N-hydroxyethyl amino)styryl]-N-methylpyridinium tetraphenylborate) is subjected to a Nd:YAG laser of wavelength of 1060 nm (i.e. 1.06  $\mu$ m), an intensity-dependent absorption, quadratic in the input intensity, is obtained due to two photon absorption. Since Figure 7 shows that dye1 has no absorbance at 1060 nm, I conclude that the nonlinear transmission shown in Figure 9 results from simultaneous two-photon absorption. The absorbance required by the observed transmission shown in Figure 9 cannot be due to single photon excitation or sequential two-photon excitation, because dye1 is not capable of being excited to any level (either a full absorbance level or an intermediate one) at an incident wavelength of over 700 nm.

9. My further analysis of the experimental data set forth in the '625 application demonstrates that the applicants were utilizing simultaneous two-photon excitation. Figure 10 of the '625 application shows the absorbance spectrogram of a "dye 1" doped film used in accordance with the '625 application, where this dye has no absorbance when subjected to incident photons with a wavelength greater than 600 nm, most specifically the wavelength of the Nd:YAG laser at 1060nm. This dye and methods for its preparation are described on page 95 of the '625 application in Example 6, and on pages 98-99 in Examples 12-14 of the '625 application. Figure 11B, as described in Example 15 (pages 99-102 of the '625 application), shows that when dye1 (i.e. trans-4[p-(N-ethyl-N-hydroxyethyl

Serial No. 09/265,625

- 6 -

amino)styryl]-N-methylpyridinium tetraphenylborate) is subjected to a Nd:YAG laser of wavelength of 1060 nm (i.e. 1.06  $\mu\text{m}$ ), a photon is emitted at 600 nm due to two photon induced fluorescence. Since Figure 10 shows that dye1 has no absorbance at 1060 nm, I conclude that the emission shown in Figure 11B results from simultaneous two-photon excitation. The absorbance required by the fluorescence shown in Figure 11B cannot be due to single photon excitation or sequential two-photon excitation, because dye1 is not capable of being excited to any level (either a full absorbance level or an intermediate one) at an incident wavelength of over 700 nm.

10. Based on all the foregoing, I conclude that the '625 application clearly discloses, to one of ordinary skill in the art, the use of simultaneous two-photon excitation.

11. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

Date: December 18, 2000

  
George Ian Allan Stegeman

**GEORGE IAN ALLAN STEGEMAN**

Professor of Optics, Physics and Electrical Engineering  
Cobb Family Distinguished Scholar Chair

Date and place of birth: 8/4/42 Edinburgh, Scotland

Citizenship: Canadian Social Security No.: 526-87-0673

**Educational background:**

University of Toronto	
PhD, Physics	1969
MSc, Physics	1966
BASc, Eng. Science	1965

**Employment history:**

CREOL, Un. Central Florida	Professor	1990-

## **Books, Special Issues**

"Nonlinear Guided Wave Phenomena", text book in preparation for Academic Press with G. Assanto (University of Rome)

"Festschrift for Boris Stoicheff's 75th Birthday", special issue for the Canadian Journal of Physics, co-edited with Rob Thompson (University of Calgary)

special issue for Chemical Physics, co-edited with Joe Zyss and Robert Twieg

"Spatial Solitons", special issue for J. Quantum and Optical Electronics, co-edited with J. S. Aitchison, May 1998

"Nonlinear Guided Wave Optics", special issue for JOSA B, co-edited with Keith Blow, December 1997

"Anisotropic and Nonlinear Optical Waveguides" edited with C. Someda, in the series Optical Wave Sciences and Technology, Elsevier, (1992)

"Nonlinear Surface Electromagnetic Phenomena", edited with H.-E. Ponath, in the series Modern Problems in Condensed Matter Sciences, Volume 29, North Holland (1991)

"Nonlinear Guided Wave Optics", special issue for JOSA B, coedited with R.H. Stolen, February 1988

"Surface Electromagnetic Excitations", Proceedings of Erice Summer School, edited with R.F. Wallis, Springer-Verlag, 1986

"Advanced Classical Electrodynamics Vol. I: Linear Optics", with F. Hopf, John Wiley and Sons, 1985

"Advanced Classical Electrodynamics Vol. II: Nonlinear Optics", with F. Hopf, John Wiley and Sons, 1986

## **Recent Invited Talks**

"Modulational instability of plane-wave eigenmodes in quadratic nonlinear media", Progress in Electromagnetics Research Symposium, Osaka Japan, July 2001

"Modulational Instability: The Role of Dimensionality and Measurement of Instability Gain Coefficients in Quadratic Media", ICONO'2001, Minsk, Belaruss, June 2001

"Spatial Modulational Instability in Planar Waveguides", NOMA 2001, Cetraro, Italy May 2001

"Periodic Spatial Instabilities of High Intensity Beams in Waveguides", QELS 2001, Baltimore, May 2001

"Experiments with Quadratic Solitons", 3 lectures at NATO ASI, Swinoujscie, Poland, September 2000

"Cascaded Nonlinearities and their Applications", (given by R. Schiek) CLEO Europe'2000, September 2000

"Propagation of High Intensity Beams and Characterization of High Order Multi-photon Effects in Polydiacetylenes", 2nd International Symposium on Optical Power Limiting (ISOPL 2000), Venice Italy, July 2000

"Spatial Solitons: A New Frontier in Nonlinear Optics", 1 hour tutorial, QELS2000, San Francisco, May 2000

"Multiphoton Effects in the Polydiacetylene PTS: A Molecular Quantum Wire With Exceptional Optical Properties", Frontier in Optoelectronics Nanosystems: Molecular-Scale Engineering and Processes NATO ARW, Kiev Ukraine, May 2000

"Photodegradation of Various Electro-Optic Polymer Families", ICONO'5, Davos Switzerland, March 2000

"Nonlinear Optics of the Polydiacetylene PTS", INOE, Puebla, Mexico, December 1999

"Photo-activated Conductivity in the Polydiacetylene PTS", seminar at Lockheed-Martin, Orlando, November 1999

"Spatial Solitons: Particles, Waves, or Does Anyone Give a Damn?" Peter Franken Memorial Symposium, Tucson, November 1999

"Nonlinear Optics of Polydiacetylene", Chitose International Forum on Photonic Sciences, Chitose Japan, October, 1999

"New Physics and Applications of Kerr Spatial Solitons in AlGaAs Waveguides", Annual OSA Meeting, Santa Clara, September 27-30, 1999

"Photodegradation of Azobenzene Electro-optic Polymers", ACS/OSA Topical Meeting on Photonics Applications of Organic Thin Films, Santa Clara, September 24-26, 1999

"Experimental Examples of Soliton Based Instabilities", Soliton Workshop in 1999 British Conference on Quantum Electronics, Manchester England, September 6 1999

"New Physics and Applications of Kerr Spatial Solitons in AlGaAs Waveguides", Nonlinear Guided Wave Phenomena, Dijon France, August 30 - September 2, 1999

"Resonantly Enhanced Multiphoton Absorption in Conjugated Polymers", NATO workshop on Multiphoton Excitations in Organics and Their Applications, Menton France, 25-30 August, 1999

"Photodegradation of Azobenzene Electro-optic Polymers", (given by Adriana Galvan-Gonzalez) Seminars, Institute of Optics, Orsay; University of Cachan, Bagneux, France, July 1999

"Bright Spatial Solitons: Particles or Waves?", Seminars, Institute of Optics, Orsay; CEN, Saclay, France, July 1999

"Resonantly Enhanced Multiphoton Absorption in Conjugated Polymers", Conference on Nonlinear Optical Materials", Cetraro Italy, June 1999

"Bright Spatial Solitons: Particles or Waves?", Colloquium, ETH, Zurich Switzerland, June 1999

"State-Of-The-Art of Spatial Solitons in  $\chi^{(2)}$  Materials", USA-Germany Workshop on Quadratic Solitons, University of Paderborn, Paderborn Germany, April 1999

"Solitons in Quadratically Nonlinear Media", colloquium, Dept. Physics, Frederick Schiller University, Jena Germany, April 1999

"Properties of Two-Dimensional Quadratic Spatial Solitons in Type I Potassium Niobate", (given by R. Malendevich), SPIE Aerosense, Orlando, April 1999

"Polymer Conductivity Matching: A Promising Route Toward Highly Efficient SHG in Polymer Waveguides", (given by V. Ricci), SPIE Aerosense, Orlando, April 1999

"Importance of Material and Operational Parameters Limiting the Photostability of Electro-optics Chromophore Doped Polymers", MRS'99 Spring Meeting, San Francisco, April 1999

"Bright Spatial Solitons: Particles or Waves?", Dept. Physics Clemson, March 1999

"Cascading: Physics and Applications", (plenary talk) 1998 International Photonics Conference, Taipei, December 1998

"Family of Type II Quadratic Solitons and Their Applications", LEOS'98, Orlando, December 1998

"Multiphoton Absorption and Higher Order Nonlinearities in Polydiacetylenes: PTS", 8'th Iketani Conference, Hokkaido Japan, October 1998

"A Comparison of Second Harmonic Generation Utilizing Quadratic Spatial Solitons Versus Conventional Methods", (upgraded paper, given by M. Ohkawa), Annual OSA Meeting, Baltimore, October 1998

"Nonlinear Refraction and Absorption in Polydiacetylenes", 2nd Conference on Optical Probes of conjugated Polymers", Salt lake City, February 15-19 (1994)

"All-Optical Switching with Second-Order Nonlinearities", (given by E. VanStryland), Snowbird Winter School on the Physics of Quantum Electronics, January 1994

"Nonlinear Spectroscopy in Organic Molecules", International Conference on Organic Nonlinear Optics", Val Thorens France, January 9-13 (1994)

"Spectral dispersion of the complex nonlinear refractive index of PTS", (given by W. Torruellas) SPIE Meeting, Los Angeles, January 1994

"Issues in organics for nonlinear optics", MRS Fall Meeting, Boston, December 1993

"Nonlinear Polymers for All-Optical Processes", Int. Symposium on Polymers for Microelectronics, Tokyo, Nov 15-19, 1993

"Nonlinear Integrated Optics", OSA 93, Toronto, October 1993

"Nonlinear Spectroscopy of Thin Organic Films", OSA Topical Meeting on Nonlinear Organic Films, Toronto, October 1993

"Large Nonlinear Phase Modulation in Quasi-Phase-Matched KTP Waveguides due to Cascaded Second Order Processes", (given by M. Sundheimer), Nonlinear Guided Wave Phenomena Topical Meeting, Cambridge, September 1993

"Optical Nonlinearities Near Half the Band-Gap in Semiconductors and Their Applications", (given by C.C. Yang), Internat. Conf. on Nonlinear Optical Physics and Applications, Nanjing China, September 1993

"AlGaAs Below Half the Band Gap: The Silicon of Nonlinear Optical Materials", School and Topical Meeting on Applications of Nonlinear Optics, Prague, August 16-20, 1993

"AlGaAs Below Half Band Gap: The Silicon of Nonlinear Optical Materials", Gordon Conference on Nonlinear Optics, August 2-6, 1993

"Integrated Optics and All-Optical Waveguide Switching", Erice summer school, July 13-26, 1993

"Nonlinear Spectroscopic Studies of Polydiacetylenes", (given by W. Torruellas), SPIE, San Diego, July 1993

"Nonlinear Integrated Optics", Institute of Optics Summer School on Nonlinear Optics, Rochester, June 1993

"Nonlinear Optical Devices Below Half Band Gap", (given by S. Aitchison), ECIO'93, Neuchatel Switzerland, April 1993

"Nonlinear Spectroscopy Of Conjugated Polymers", MRS Spring Meeting, San Francisco, April 1993

"Current Status of Nonlinear Materials and Their Applications to Waveguide Devices", Integrated Photonics Research, Palm Springs, March 1993

"Material Figures of Merit and Implementations of All-optical Waveguide Switching", SPIE, Los Angeles, January 1993

"Nonlinear Optical Photonic Devices: Relative Status Of Polymeric Materials", Second International Conference on Frontiers of Polymers and Advanced Materials, Jakarta Indonesia, Jan 10-15, 1993

"Linear and Nonlinear Optical Properties of Polymers", American Institute of Chemical Engineering, Miami, November 1992

"Nonlinear Fiber Filter: Demonstration of Phase-Controlled Switching, Optical Logic and Demultiplexing", Workshop on Materials and Devices for Ultrafast All-Optical Switching, Twente Holland, October 1992

"Elastic Properties of MBE-Grown Crystalline Metallic Films and Multilayers", IEEE Ultrasonics Symposium, Tuscon, October 1992

"Large Nonlinear Phase Shifts Via Second Order Processes", Workshop on Materials and Devices for Ultrafast All-Optical Switching, Twente Holland, October 1992

"Device Considerations for Nonlinear Optical Materials", US-France Workshop on the Chemistry of Optical Materials, Maubuisson France, Sept. 29-Oct. 2, 1992

"Ultrafast Switching in AlGaAs Waveguide Devices", given by J.S. Aitchison, OSA'92 Annual Meeting, Albuquerque, September 1992

"Cascading for Large Third Order Nonlinearities", given by E. VanStryland, Nonlinear Optics: Materials, Fundamentals and Applications", Maui Hawaii, Aug. 17-21 (1992)

"Nonlinear Organics: Will they be used for Devices?", Gordon Conference on Transport and Nonlinearities in Organic Materials", New Hampshire, July 26-31, 1992

"Efficient All-Optical Switching in AlGaAs at 1.55 Microns", Fourth Optoelectronics Conference, Chiba Japan, July 15-17, 1992

"Current Topics in Nonlinear Guided Waves", Capri, June 1-5, 1992

"Very Large Third Order Nonlinearities Via Cascading of Second Order Nonlinearities", IQEC'92, Vienna Austria, June 1992

"Nonlinear Optical Interactions in AlGaAs Near One Half Band Gap", QELS'92, Anaheim CA, May 11-15, 1992

"6 Lectures on Nonlinear Photonics", INOE 50'th Anniversary Lectures, Mexico, April 1992

"Characterization of Organic Materials for All-Optical Switching Devices", given by Dieter Neher, Workshop on Organic Optoelectronic Materials, Monterey, March 1992

"Nonlinear Organics: Will they be used for Devices?", American Physical Society Spring Meeting, Indianapolis, March, 1992

"Ultrafast All-Optical Switching", AAPT Winter Meeting, Orlando Florida, January 6, 1992

"Nonlinear Optics of Conjugated Polymers", MRS Meeting, Boston, December 1991

"All-Optical Switching Devices: Fiber Versus Integrated Optics", 16'th Australian Conference on Optical Fibre Technology, Adelaide, December 1991

"Enhanced Elastic Constants of Ag/Pd Superlattice Films", (given by J.R. Dutcher), Office of Naval Research Workshop on the Elastic Properties of Multilayers and Superlattices, Tucson, October 1991

"Overview of Nonlinear Characterization Techniques", Ceramic Society, Washington, October 1991

"Material Requirements for Nonlinear Third Order Phenomena in Waveguides", Toyota Conference on Nonlinear Optics, Nagoya, October 6-9, 1991

"Nonlinear Optics of Polymers", ILS-VII, Monterey, CA, September 1991

"Prospects for Nonlinear Organics in Waveguides", Topical Meeting on Nonlinear Guided Wave Phenomena, Cambridge UK, September 1991

"Nonlinear Optical Probes of Conjugated Polymers", (given by Dieter Neher) Optical Probes of Conjugated Polymers, Salt Lake City, August 1991

"Introduction to Nonlinear Guided Wave Phenomena", NATO Advanced Institute on Nonlinear Guided Wave Phenomena, Cargèse, August 1991

"Nonlinear Integrated Optics", Institute of Optics Summer School on Nonlinear Optics, Rochester, June 1991

"Nonlinear Integrated Optics", SPIE Short Course, Dallas, May 1991

"Superlattice Mechanical Properties of LB Films", MRS Meeting, Anaheim, May 1991

"Material Requirements for All-Optical Devices: Nonlinear Properties of Poly4-BCMU", MRS Meeting, Anaheim, April 1991

"Nonlinear Optical Devices: Status of Polymeric Materials", MRS, Anaheim, April 1991

"Nonlinear Optical Devices: Relative Status of Polymeric Materials", Int. Conf. on Frontiers of Polymer Research, Delhi, January 1991

"Nonlinear Optoelectronic Devices", Second International School on Photonics, Oaxtepec Mexico, January (7-18) 1991

"Optical Nonlinearities in Composite Semiconductor Waveguides", Second International Ceramic Science and Technology Congress, Orlando, November 1990

"Nonlinear Optical Devices: Current Status", OMNO 90, Oxford, September 1990

"Nonlinear Optics in Waveguides", Gordon Conference on Dielectric Phenomena, New Hampshire, July 1990

"Nonlinear Guided Wave Grating Phenomena", Topical Meeting on Nonlinear Optical Devices and Materials, Honolulu, July 1990

"Nonlinear Integrated Optics", Institute of Optics Summer School on Nonlinear Optics, Rochester, June 1990

"Nonlinear Guided Wave Phenomena", France-Israel Conference on Nonlinear Optics, April 1990

"Device Applications of  $\chi^{(3)}$  Materials", tutorial for American Chemical Society Annual Meeting, Boston, April 1990

"Two Photon Absorption: Limitation to All-Optical Switching, Workshop on Space-Time Complexity in Nonlinear Optics, Tucson, March 1990

"Nonlinear Guided-Wave Grating Phenomena", (given by J. Ehrlich), Int. Conf. on Optical Science and Engineering, The Hague Netherlands, March 1990

"Progress in Waveguide Structures and Devices", International Chemical Congress of the Pacific Basin Societies, Honolulu, December 1989

"Progress in Semiconductor Doped Glass Waveguides", International Symposium on New Glass, Tokyo, November 1989

"Nonlinear Optics in Semiconductor-Doped Glass Waveguides", ISSWAS'89, Sofia Bulgaria, September 1989

"Saturation of Nonlinearities and Waveguide Device Implications", San Diego, August, 1989

"Nonlinear Optics in Planar Waveguides", SPIE short course, San Diego, August, 1989

"All-Optical Switching in Waveguide Geometries", IOOC'89, Kobe Japan, July 1989

"Nonlinear Optical Waveguides", tutorial at IOOC'89, Kobe Japan, July 1989

"Overview of Nonlinear Integrated Optics", Ettore Majorana Summer School on "Nonlinear Guided Wave Phenomena in Solid State Physics", Erice Italy, July 1989

"Metallic Multilayers and Superlattices", (given by J.R. Dutcher) American Crystallographic Assoc. - Symposium on Interface Science and Technology, Seattle WA, July 1989

"Elastic Properties of Langmuir-Blodgett Films", Central Regional Meeting, American Chemical Society, Cleveland, May 1989

"Nonlinear Guided Wave Devices" and "All-Optical Guided Wave Switching", Second Annual Photonics Symposium of the New York State Science and Technology Foundation, Binghamton NY, May 1989

"Brillouin Spectroscopy of LB Films", (given by Wolfgang Knoll) Fourth International Conference on Langmuir-Blodgett Films, Tsukuba, Japan, April 1989

"All-Optical Switching in Fibers", V National Symposium on Optical Fibers, Warsaw, Poland, February 1989

"Materials Implications of Nonlinear Optical Devices", (given by R.H. Stolen) Fourth International Conference on Ultrastructure Processing of Ceramics, Glasses and Composites, , Tucson, February 1989

"Brillouin Scattering in Langmuir-Blodgett Films", (given by Wolfgang Knoll) SPIE Conference on Photochemistry in Thin Films, January 1989, Los Angeles

"Nonlinear Guided Wave Materials and Devices", Glass Meeting of the American Ceramic Society, Tucson, November 1988

"Modulated Index Structures in Thin Films", OSA Annual 1988, Santa Clara, November 1988

"Progress in Nonlinear Guided Wave Phenomena", Lasers and their Applications, Plovdiv (Bulgaria), October 1988

"Nonlinear Optics in Thin Films", Annual Vacuum Society Meeting, Atlanta, October 1988

"Brillouin Scattering at Surfaces and in Thin Films", Workshop on Scattering of Electromagnetic Radiation, Madrid, September 1988

"Second-Harmonic Generation as a Probe of Thin Film and Monolayer Microstructure" (to be given by V. Mizrahi) Trends in Quantum Electronics '88, Bucharest, August 1988

"Photo-Induced Nonlinearities in Optical Glass Fibers" (given by U. Osterberg) Nonlinear Optical Properties of Materials, Troy, N.Y., August 1988

"Fibers and Waveguides for Nonlinear Optics", Nonlinear Optical Properties of Materials, Troy, N.Y., August 1988

"Review of Nonlinear Guided Wave Devices", OMNA'88, Oxford, June 1988

"Nonlinear Waveguide Phenomena in Organic Polymers", NATO Advanced Research Workshop, Nice France, June 1988

"Progress in Nonlinear Integrated Optics", (given by R. Zanoni) The International Conference on Nonlinear Optical Phenomena, Ashford Castle, Ireland, May 1988

"Organic Materials for Nonlinear Integrated Optics", AFOSR Contractors Meeting, Washington, April 1988

"Nonlinear Guided Wave Characteristics", Integrated and Guided Wave Optics 88, Santa Fe, New Mexico, March 1988

"Nonlinear Integrated Optics", Electrooptics Review Panel, Taiwan, January 1988

"Planar Nonlinear Guided Wave Phenomena", Winter Quantum Electronics Conference, Snowbird Utah, January 1988

"Materials and Devices for Nonlinear Guided Waves", (given by N. Finlayson) SPIE Conference on Optical Computing and Nonlinear Materials", Los Angeles, January 1988

"Nonlinear Organic Materials in Integrated Optics", Materials Research Society, Boston, December 1987

"Nonlinear Guided Wave Devices: Material Requirements", SPIE Conference, Cannes France, November 1987

"Nonlinear Waveguides", (given by C.T. Seaton) 1987 International Topical Meeting on Optical Bistability, Instability and Optical Computing, Beijing, August 1987

"Nonlinear Optics in Planar Waveguides", SPIE short course, San Diego, August 1987

"Nonlinear Thin Film Devices: Applications and Material Requirements", DARPA Workshop on Nonlinear Optical Materials and Devices, La Jolla, July 1987

"Nonlinear Optics in Waveguides", Annual Meeting of Canadian Association of Physicists, Toronto, June 1987

"Linear and Nonlinear Optical Phenomena at Surfaces", USA-USSR Binational Symposium on Laser Optics of Condensed Matter, Leningrad, June 1987

"Non-linear Effects in Surface Plasmon and Guided Mode Propagation", The Rank Prize Funds Meeting on Two-Dimensional Plasmons", Malvern, UK, May 1987

"Surface Acoustooptics", Celebration Meeting for 50'th Anniversary of Istituto di Acoustica "O.M. Corbino", Rome, April 1987

"Experiments in and Device Applications of Nonlinear Waveguides", Workshop on State of the Art Developments in Nonlinear Optics, Dept. of Mathematics, Un. of Arizona, March 1987

"The State of the Art of, and Future Research Needs in Integrated Optics Structures", NSF Workshop on The Molecular Engineering of Ultrathin Polymeric Films, UC Davis, February 1987

"Nonlinear Integrated Optics: Materials and Devices", (given by C.T. Seaton), Basic Science, Glass and Electronics Joint Meeting of the American Ceramic Society, New Orleans, November 1986

"Soliton Effects in Nonlinear Waveguides", 11'th Workshop on Optical Waveguide Theory, Madrid, Spain, September 1986

"Third Order Nonlinear Guided Wave Optics", (given by C.T. Seaton) SPIE Conference on Molecular and Polymeric Optoelectronic Materials: Fundamentals and Applications, San Diego, August 1986

"Nonlinear Waves Guided by Multilayer Media", International Symposium on Surface Waves in Solids and Layered Structures", Novosibirsk, USSR, July 1986

"Recent Developments in Nonlinear Guided Waves", Conference on Lasers and Electrooptics" (CLEO), San Francisco, June 1986

"Brillouin Scattering from Langmuir-Blodgett Films", Gordon Conference on Organic Films, Santa Barbara, February 1986

"Nonlinear Guided Wave Phenomena", Topical Conference on Optical Bistability, Tucson, December 1985

"Nonlinear Integrated Optics", 5'th International Conference on Integrated Optics and Optical Fibre Communications, Venice, Italy, October 1985

"Nonlinear Planar Guided Wave Interactions", AGARD (NATO) Meeting on Guided Optical Structures, Istanbul, Turkey, September 1985

"New Developments in Nonlinear Waveguide Theory", 10'th Workshop on Optical Waveguide Theory, Castelgandolfo, Italy, September 1985

"Intensity-Dependent Guided Wave Phenomena", 2'nd International Conference on Optical Circuit Engineering, Cambridge, September 1985

"Nonlinear Guided Wave Phenomena: Physics and Applications", Trends in Quantum Electronics '85, Bucharest, September 1985

"Nonlinear Waves Guided by Surfaces", 2'nd International Conference on Surface Waves, Ohrid Yugoslavia, September 1985

"Nonlinear Guided Wave Phenomena", 4 lectures jointly presented at Ettore Majorana Summer School on "Surface Electromagnetic Excitations" and at Summer School on "Nonlinear Optics", Erice Italy, July 1985

"Nonlinear Third Order Integrated Optics", European Conference on Integrated Optics (EICO'85), Berlin West Germany, May 1985

"Beam Steering with Nonlinear Gratings", DARPA Workshop on Optical Interconnects, San Diego, July 1984

"Nonlinear Surface Polaritons", lecture at Ettore Majorana Summer School on "Dynamical Phenomena at Surfaces, Interfaces and Superlattices", Erice Italy, July 1984

"Nonlinear Guided Wave Gratings", ARO Workshop on Optical Switching, Irvine, March 1984

"Applications of Nonlinear Optics with Guided Waves", Royal Society Meeting on Optical Bistability, Dynamical Nonlinearity and Photonic Logic, London, March 1984
